

Sample whole-farm plan summary

An example of the plan summary a farm keeps on record. All names and numbers are fictitious.

Operation	Laurel Branch Farm (fictitious)
Location	Sample County, North Carolina
Total acres	142.5 across 4 fields
Program	NRCS Regenerative Pilot Program, FY2027 application
Contract term	October 2026 to September 2031 (planned)
Whole-farm assessment	Completed 2026-09-01 by a technical service provider (demo)
Resource concerns	Soil: yes. Water: yes. Natural vitality: yes.

Fields

Field	Acres	Land use	Main concern
North Bottom	48.0	Cropland	Sheet erosion, low organic matter
Creek Pasture	61.5	Pasture	Bare ground near creek, compaction
Hilltop	22.0	Cropland	Slope erosion
Orchard Row	11.0	Orchard or perennial crop	Weed pressure, soil cover

Planned practices

Code	Practice	Primary	Field	Years	Extent
340	Cover Crop	Yes	North Bottom, Hilltop	2027-2031	70 ac/yr
329	Residue and Tillage Management, No Till	Yes	North Bottom	2027-2031	48 ac
528	Prescribed Grazing	Yes	Creek Pasture	2027-2031	61.5 ac
590	Nutrient Management	Yes	All cropland	2027-2031	70 ac
484	Mulching	Yes	Orchard Row	2027-2028	11 ac
CEMA 216	Soil Health Testing	No	All fields	2027, 2031	8 samples

A real plan comes from your NRCS conservation planning. This summary is what Made in USA Inc. records so each field log and soil test can be tied back to the plan.
