

Sample farm intake record

SAMPLE / DEMO — NOT FOR SUBMISSION

A fictional example showing the level of detail that makes an intake easier to understand. It is not a real farm record or an agency form.

Farm name	Example Ridge Farm
Contact	Example Farmer
Email	example.farmer@example.com
Farm location	Iowa; county not supplied in this fictional example
Approximate acres	120 total: 75 cropland + 35 pasture + 10 woodland
Interests	Cover Crop; Prescribed Grazing
NRCS status	Applied — farmer-reported example only
Fiscal year	Not sure — confirm against the original record
Notes	Existing application is retained. No new agency application is created.

HOW TO USE THIS EXAMPLE

- Use your own details; do not copy the example identity.
- Selecting a practice records an interest, not completed work.
- Keep original application dates and evidence.
- No signature, certification, or agency receipt is included.

Sample practice log and photo record

SAMPLE / DEMO — NOT FIELD EVIDENCE

A fictional record showing how one activity can be linked to a field, a date, and a supporting file. It is not an implementation specification or proof of work.

Farm / field	Example Ridge Farm / North Field (fictional)
Practice interest	Cover Crop (340)
Illustrative date	2026-09-10 — not an actual activity date
Activity note	DEMO: cover-crop planting activity described here
Photo reference	DEMO-PHOTO-01 — placeholder; no real photograph attached
Photo description	Describe what is visible and the field viewpoint
Location record	Field name only in this example; no real coordinates
Record status	SAMPLE / DEMO; not reviewed; not certified

HOW TO USE THIS EXAMPLE

- Record actual dates and locations for real work.
- Retain the original photo; do not replace it with a stock or AI-generated image.
- A photo can support a record but does not establish every review requirement.
- No real photo, reviewer decision, or certificate is included.

How to read a soil report: sample guide

SAMPLE / DEMO — NOT A LABORATORY REPORT

A reading guide to help connect an authentic laboratory report to the correct field and sample. No laboratory, measurement, or test result is invented.

Farm / field	Match the identifiers on the real report to your own field record
Sample identifier	Use the laboratory's actual sample ID
Sampling date	Use the real collection date, not the upload date
Sampling details	Keep the recorded depth, locations, and method where supplied
Laboratory / report ID	Retain the actual issuing laboratory and original report ID
Results / units / methods	Use the original report; no example values are supplied
Baseline or later test	Identify its actual role in the applicable plan or contract
Reviewer status	Unreviewed until the appropriate review is completed

HOW TO USE THIS EXAMPLE

- Do not type invented numbers into missing result fields.
- Keep the original report intact, including units and methods.
- Do not assume an ordinary nutrient panel meets every soil-health requirement.
- Confirm required testing with the applicable plan and qualified provider.
